

# The Ultimate Puzzles

The solutions to Mr. Lee Willcott's Ultimate Puzzles (One and Two)

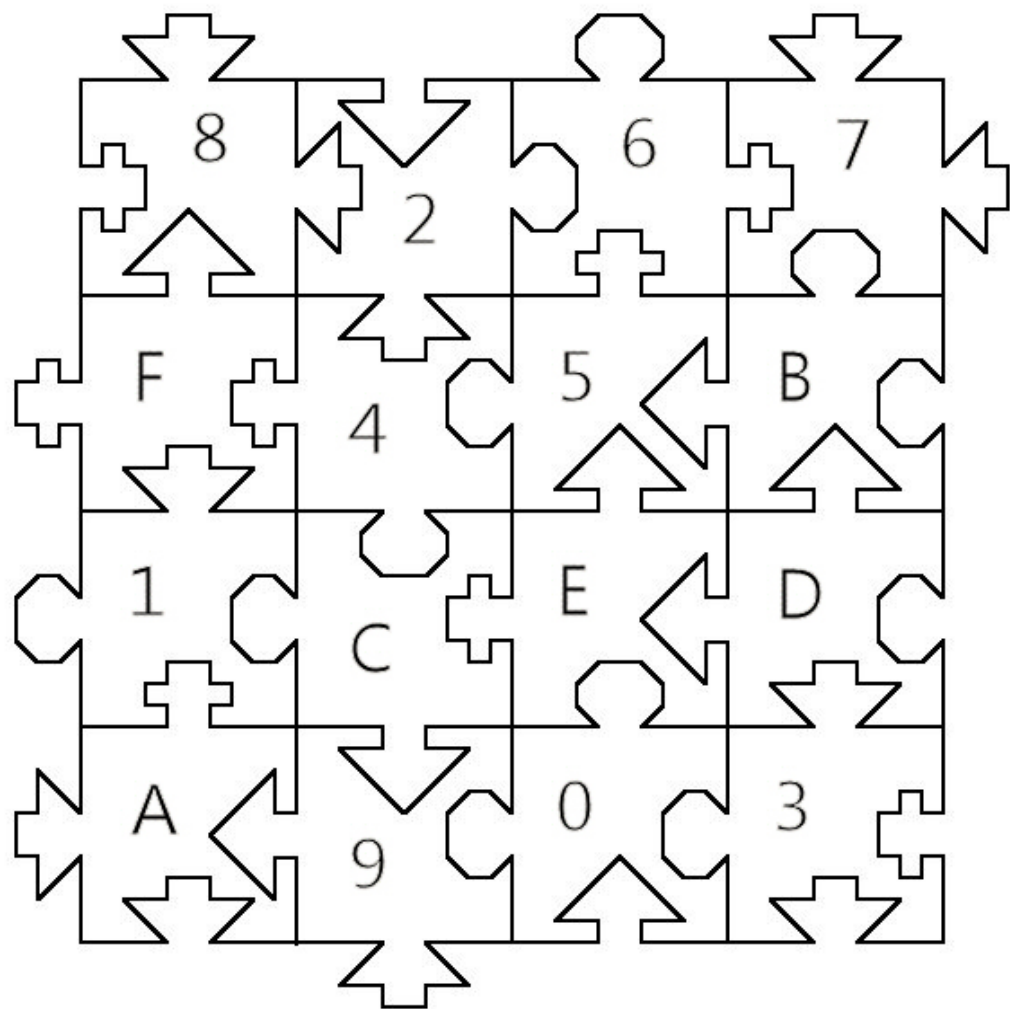

## Puzzle One Solutions

There are twelve groups of four solutions, due to the rotational symmetries of the square. Each of the twelve images below may be rotated by +90, -90 or 180 degrees to generate thirty-six additional puzzle solutions, giving forty-eight in total. [This](#) is an OpenDocument text file with all forty-eight solutions of The Ultimate Puzzle, systematically listed in four columns and twelve rows. The first column contains the twelve distinct solutions imaged below (and also included in the text file). The solutions in each row are quarter turn rotations of each other.
